

THERAPY CUBE™

Far-infrared sonic vibration body therapy

Win the game even before it begins

 A short procedure (10 min.) prepares the body for training and thus increases the effectiveness of it.

 Preheated muscles allow you to achieve a higher load without injuries and overloading.

 Sound vibrations accelerate the regeneration of the nervous system and muscles.

 The therapy accelerates blood circulation and increases fitness.

 THERAPY CUBE™ procedure lasts 10 minutes, is pleasant and before and after training significantly increases the effectiveness of training.

Interested in keeping your club ahead of others?
Studies have shown an increase in punching power of up to 26% within three months of use THERAPY CUBE™.

You can get **THERAPY CUBE™** through a favorable rental with absolutely no investment.
